

Venice Dual Force Main Project Community Briefing

**Wednesday, October 22, 2014
6pm to 8pm**

Burton Chace Park Community Room
13650 Mindanao Way, Marina del Rey

The City of Los Angeles Department of Public Works will construct a new force main sewer to supplement the existing 50-year-old force main sewer. The project is in its final permitting processes.

The sewer alignment will cross Grand Canal from the Venice Pump Plant and continue east along Marquesas Way to Via Marina, then travel south crossing the Marina del Rey and Ballona Creak Channels to Vista del Mar. The alignment crosses both City and County jurisdictions.

Please join the City of Los Angeles Department of Public Works for an update on the Venice Dual Force Main project. City and County staff will be on hand to provide an overview of the project, its purpose and the coastal development permitting process.
